TOOLS

of the Month

① A/C flushing, solvent recycling

Hecat has released its H1000 Closed Loop A/C Component Flusher, designed exclusively for Honeywell's GenesolvSF solvent. The H1000

is a non-ozone depleting, non-flammable and EPA-approved replacement for HCFC-141b. The flusher blasts components clean with a high-velocity liquid flush, then purges all the removed waste oils. The final vacuum recovers any trace solvents, leaving the component clean and dry. The company says no solvent disposal is required because the unit filters and distills it for a full recycle and recovery. The flusher features full automation, two years of performance testing and a UL 1963 certification.

② Find the short in half the time

I.P.A.'s No. 8005 Fuse Saver plugs into a blown fuse socket to troubleshoot shorts. If the circuit overloads, the breaker button on the top of the handle allows you to continue working until the problem is found. The Fuse Saver comes with three breaker handles: 10 amp, 15 amp and 20 amp, and allows users to move about the vehicle while checking for shorts. Features include:

- Color matching handles for easy identification.
- Dual-type fuse box connector with 10-foot cord.
- Blow-molded storage case.

③ Schley oxygen sensor socket for Toyota/Lexus

Schley Products Inc. introduces its Shielded Oxygen Sensor Socket No. 66750, designed to repair newer shielded oxygen sensors in Toyota and Lexus models. A 12-point double-hex doubles clock angle attachment positions. The sensor socket is constructed of maximum strength forged steel with SP high-tech black finish.

④ Flexible wrenches gain unique access capabilities

Lock Technologies Inc. has developed a unique line of wrenches designed to increase work efficiency and ease. LT-975 and LT-976 Flex-Head Line Wrenches tout the following features:

- New Flex-Head design to access hidden and recessed line fittings.
- Ideal for all hydraulics, fuel, oil, brake, A/C and air-line work.
- Chrome-vanadium steel.
- 270-degree wrap-around head with two-sided versatility
- Available in five-piece SAE and six-piece metric sets.
- Each set comes in a blow-molded case

⑤ Magnum storage takes on mammoth capacity

Waterloo Industries introduces its new Magnum Facility Storage system, with up to 4 tons of capacity. Waterloo says it built this workstation/storage solution to be the strongest and leanest in the industry. The tough, durable units are customizable to individual applications. The Magnum Facility Storage features a floor cabinet, wall cabinet, and 6' workbench with a back wall.
