

# The HECAT "Pulsator" Flush Gun

## Multi-Use Heat Exchanger Cleaner

### Perfect for oil coolers and A/C components

Many service shops that do a limited number of A/C repair jobs, transmission repair, or rebuilt transmission installs, as well as DIY technicians, due to the limited need, cannot justify or afford professional flushing equipment. Technicians in this situation are often left with little options but aerosol can cleaners and the traditional 1-qt. type flush gun. While better than doing nothing, these products have a very limited volume of solvent and an even more limited method of producing solvent velocity necessary to back out debris from today's heat exchangers. To answer this, HECAT decided to offer the Patented Pulsating Scrubbing action (US Patent # 5615695) of our professional flushers built into a very affordable DIY type package suitable for a variety of flushing uses and applications.

- High flow blasting "Pulsating" action.
- 1-gal. Solvent capacity.
- Works with air pressure of 30 to 90 psi.
- 100 psi ASTM safety pop off valve.
- Air Regulator included.
- Multiple sized rubber tips.
- Multi-sized return line adapter & hose.
- Flush Gun Safety Trigger Lock.
- Ships & Stores in its own recovery bucket.
- Shipping Box: 15H x 12W x 12D (inches)
- Shipping Weight: 20 lbs.
